ANTI-WAR PROTEST

RUSSIA - HANDS OFF CHECHNYA!

The Russian attack on Grozny is totally unjustified. Thousands of civilians have been bombed, hundreds of thousands are now homeless and all because of Yeltsin's determination to keep oil supplies in the hands of the Russian Federation.

If this horror was happening in Sarajevo there would be a huge outcry from around the world. The hypocrisy of Western governments is that they are more concerned with keeping Yeltsin in power than with the plight of the Chechnyan people.

Opposition to this war cannot be left to the politicians. It is up to us to show solidarity with the people of Chechnya and the anti-war movement in Russia.

We demand that Russia withdraws all troops from Chechnya and that Dick Spring, as Minister for Foreign Affairs, publicly condemns the actions of the Russian government.
